Home page for the software. <http://www.w1hkj.com/index.html>

Fldigi (Fast Light Digital Modem Application), pronounced “F L digi”, is a cross-platform modem program that supports most of the peer-to-peer (live keyboard) digital modes used on the amateur radio bands.

Narrow Band Emergency Messaging System an integrated suite of programs that can be used for both emergency communications and recreational operations. The software is designed to run on nearly any modern computer and can be easily interfaced with almost any radio.

FLDigi

Interfaces

Need a radio, computer, interface between the two, and software.

- Signalink USB (preferred)
- Rigblaster (with sound card)
- Built in USB on newer radios with sound card
- Build your own connection
- Acoustic interface

All audio/DSP enhancements must be disabled!

FLDigi

What are the minimum hardware requirements for fldigi?

We recommend at least a 1.2 GHz processor for most digital modes, and at least a 1.6 GHz processor for CPU-intensive modes like DominoEX and Thor.

A faster CPU may be needed for multiple PSK decoding.

Fldigi can interface with many transceiver models via Hamlib, RigCAT, or using the peer application flrig.

FLDigi

FLDigi

It will install in Program Files (x86) and C:\Users\USER\fldigi.files

fldigi.files holds the configuration files.

fldigi.files is not removed on de-install.

There are so many options you need to use the defaults until you are use to changing parameters.

If you get it in a unusable condition, remove it from the computer and delete the fldigi.files folder

You will need to calibrate your sound card.

You can use these web sites to do it.

http://www.w1hkj.com/FLdigiHelp-3.21/html/digiscope_display_wvw_mode.html

<http://www.mixw.net/files/CheckSR.exe>

FLDigi

- **Most** soundcard digital modes use **USB**
- Don't overdrive the audio. Use less power, particularly locally.
- Check your windows settings -> system -> sound -> other sound options.

Make sure system sounds are not on your fldigi sound card.

FLDigi must be running to see the soundcard associated with it.
