Online versions: keeps track of your log.

# 2022 Winter Field Day Software

Winter field day operations is mainly an ARES event that all hams participate.

Read the rules. This year GARS will do an at home version.

All stations that participate will use their call sign and affiliate with

Gwinnett ARS as a club aggregate score.

226 Transfer complete

URL you specified.

Check that this function is working properly by clicking the Upload Now button on this form. Any errors will be displayed when called here, but they will not be displayed when uploading from the main form. That way, if Internet access is temporarily down, etc., you can continue logging for the contest without distraction.

Note, you may have to create the directory on your website with your website publishing tool before this software is able to upload this status file to the directory if the directory doesn't already exist.

If your website host uses a different port than 21 for your uploads, include the port in your URL. For example, if you are uploading your file to a directory named fd and your site uses port 7200, instead of this:

ftp://yoursite.com/fd/

Format it like this:

ftp://yoursite.com:7200/fd/

Also, some hosts require public\_html in the upload path, along the lines of this: ftp://yoursite.com/public\_html/fd/

If you've never published a web page before, don't start here. Instead, using an FTP program, publish a test page to your web hosting space manually so that you can figure out all of your upload settings more easily. Once you have the settings working in your FTP program and you've verified you are successfully able to upload files to your hosting space, you can transfer your settings here. I'm not able to extend support to include teaching folks how to set up hosting sites and upload files, but you can Google the process for more details.

During the brainstorming process for this feature, some groups who don't have Internet at their Field Day site requested I also code a text file that could be transmitted by packet, so I have created that as well. Of course, you will have to configure your packet software to attach the file to a message and send it automatically every few minutes.

[Please click here for the Club Score Processor setup instructions.](#)

## **Before set up your logger**

Before configuring your logger to post contest score online you have to register your profile on the Contest Online Score Board site by visiting the following link:

**<https://contestonlinescore.com/profile/>**

# 2022 Winter Field Day Software

If you use N1MM or anyone of the following you can use an online

- Win-Test
- N1MM (Classic)
- N1MM +
- WriteLog
- DXlog
- TR4W
- TR Log for Linux
- UCXlog
- QARtest
- N3FJP loggers
- RUMLog
- SkookumLogger

If you can't get your score posted to the server board feel free to contact us by email

**[admin@contestonlinescore.com](mailto:admin@contestonlinescore.com)**

# 2022 Winter Field Day Software

I don't use any other software for logging. You will have to set it up by what you find on the site.
